Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Joutaki et al.  
6,729,424.

Regarding claim 1, Joutaki et al. '424 discloses a coupling structure of a hood lock stay comprising a radiator core support upper member (13) extending in a transverse direction of a motor vehicle; a radiator core support lower member (14) extending under said radiator core support upper member in the transverse direction of the motor vehicle; and a hood lock stay (15) which is coupled in a vertical direction of the motor vehicle each other with almost center portions of said radiator core support upper member and said radiator core support lower member, said hood lock stay securing a hood lock (16) to an upper portion thereof, wherein said radiator core support upper member is formed to have at least an opened cross-sectional shape provided with a wall portion, and wherein said radiator core support upper member and said hood lock stay are coupled with each in a state forming a box shape by disposing the upper portion of said hood lock stay so as to cover an opening of the opened cross-section of said radiator core support upper member in Figure 1.

*Allowable Subject Matter*

3. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

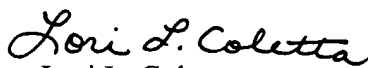

The cited references show several other coupling structures of a hood lock stay similar to that of the current invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lori L. Coletta whose telephone number is 571-272-6658.
